manufactured using materials of animal origin. This information may be contained in the animal source table and/or in one or more of the additional paragraphs found on the COA. Following Quality Control release, the COA is created and published at http://www.bd.com/regdocs. For each batch of finished product that contains animal origin raw materials, the COA shows the animal origin data from the individual lots of animal origin raw materials used, as provided by the raw material suppliers.

At times, suppliers notify BD Biosciences Advanced Bioprocessing of new and/or additional information they have received from their raw material suppliers that modifies the animal origin information for lots previously provided to BD Biosciences Advanced Bioprocessing. See "COA Animal origin Information Position Statement" located at http://www.bd.com/regdocs under "position Statements" for the impact that retrospective information has on BD Biosciences Advanced Bioprocessing COAs and on customers enrolled in the BDDS and BDAB Automated Change Notification Program.

For complete details on animal origin information, refer to "BD Position Statement - BD Diagnostics-Diagnostic Systems, COA Animal Origin Information Position Statement", at

http://www.bd.com/readocs/ under "Position Statements".
